## Products Listing via Bulk Upload Method
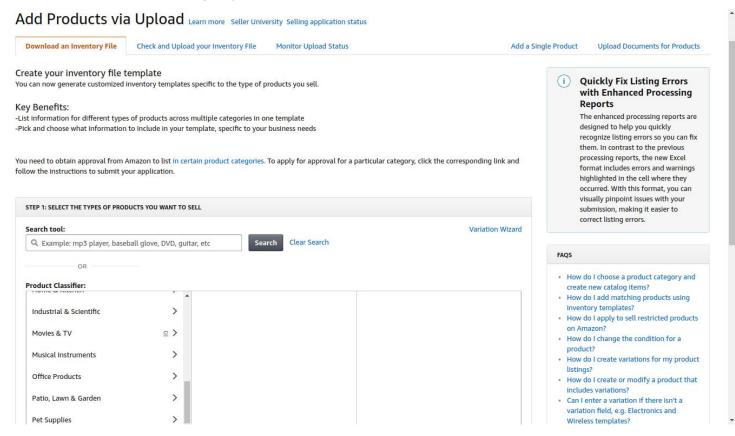

Go to Services.amazon.com & Click the "Start Selling" Link.

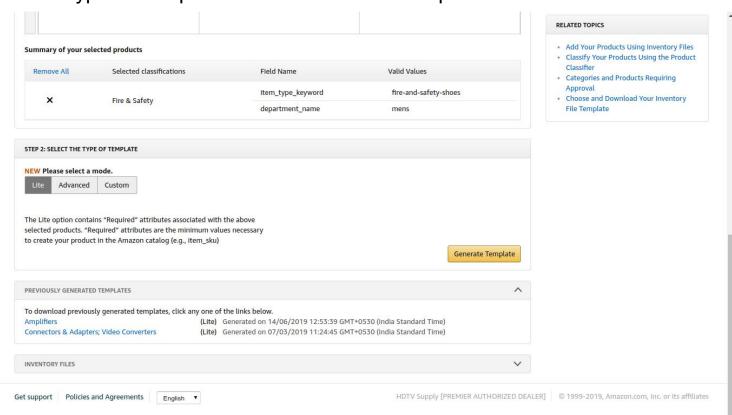

Click on Catalog

Chose Products Category
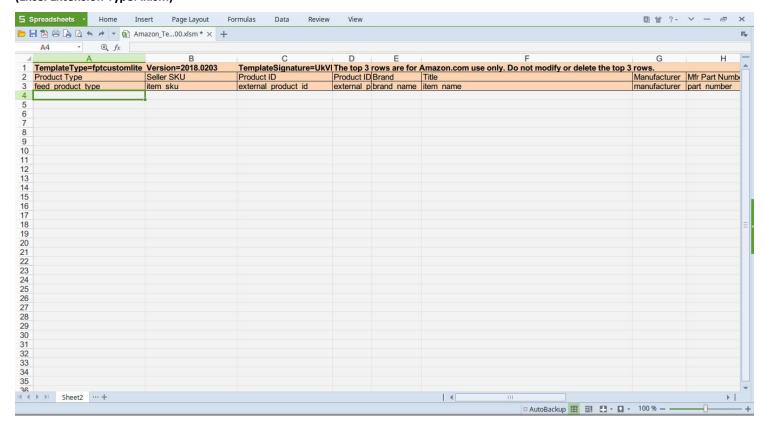

Add Products via Upload Learn more Seller University Selling application status

Download an Inventory File   Check and Upload your Inventory File   Monitor Upload Status   Add a Single Product   Upload Documents for Products

Create your inventory file template
You can now generate customized inventory templates specific to the type of products you sell.

Key Benefits:
-List information for different types of products across multiple categories in one template
-Pick and choose what information to include in your template, specific to your business needs

You need to obtain approval from Amazon to list in certain product categories. To apply for approval for a particular category, click the corresponding link and follow the instructions to submit your application.

STEP 1: SELECT THE TYPES OF PRODUCTS YOU WANT TO SELL

Search tool: Variation Wizard

🔍 Example: mp3 player, baseball glove, DVD, guitar, etc   **Search** Clear Search

— OR —

Product Classifier:

Home & Kitchen   >
Industrial & Scientific   >
Movies & TV   🔒 >
Musical Instruments   >
Office Products   >
Patio, Lawn & Garden   >
Pet Supplies   >

ⓘ **Quickly Fix Listing Errors with Enhanced Processing Reports**

The enhanced processing reports are designed to help you quickly recognize listing errors so you can fix them. In contrast to the previous processing reports, the new Excel format includes errors and warnings highlighted in the cell where they occurred. With this format, you can visually pinpoint issues with your submission, making it easier to correct listing errors.

FAQS

- How do I choose a product category and create new catalog items?
- How do I add matching products using inventory templates?
- How do I apply to sell restricted products on Amazon?
- How do I change the condition for a product?
- How do I create variations for my product listings?
- How do I create or modify a product that includes variations?
- Can I enter a variation if there isn't a variation field, e.g. Electronics and Wireless templates?

Chose Type of Template & Click Generate Template

Summary of your selected products

Remove All	Selected classifications	Field Name	Valid Values
✕	Fire & Safety	item_type_keyword	fire-and-safety-shoes
		department_name	mens

STEP 2: SELECT THE TYPE OF TEMPLATE

NEW Please select a mode.

[Lite] [Advanced] [Custom]

The Lite option contains "Required" attributes associated with the above selected products. "Required" attributes are the minimum values necessary to create your product in the Amazon catalog (e.g., item_sku)

                                                          Generate Template

# Save Your .XLSM File & Go to Amazon Add Products via Upload.

Check Your Inventory File Before Upload

(**Please Note:** Check My File is an optional step in the listing process that enables you to "pre-check" your inventory template for a majority of common errors. The Check My File feature simulates the changes that your listing submission will have on your catalog. You therefore have the benefit of getting feedback on your listing submissions without risking unintended changes to your inventory.)

⚠ If you are using category-specific inventory files or the Book Loader, Amazon has updated these templates and asks that you start using the new templates immediately. For more details on this change, refer to this link .
Note that the Inventory Loader, Listing Loader, and Price and Quantity files will not be impacted by this change.

STEP 1 - CHECK YOUR FILE   ⌄

This feature will not add products to your catalog.

Use Check My File to
- Automatically configure variations. Learn more
- Check for common listing errors in your inventory file.

File type   [Inventory Files for non-Media Categories ⌄]

Inventory Files can be used to create new listings and add products to the Amazon catalog. Use this option if your file is for products in categories other than Books, Music, Video and DVD.
